It is a great pleasure to welcome you to the 2nd Edition of the Tirol Urogynaecology Summit held in the beautiful city of Innsbruck, a premier event in the field of urogynaecology, organised by the Tirol Kliniken-Hall District Hospital, bringing together clinicians, surgeons, researchers, and trainees from across Europe.

This year's symposium is particularly special — not only because of the cutting-edge topics we'll be covering, but also because of the format we've designed to maximize learning and interaction. We're proud to offer a truly hybrid experience, with participants joining us both in person and online.

Over these three days, you'll have the opportunity to:

- Learn directly from renowned European experts through live lectures and interactive discussions
- Observe live surgical procedures, offering real-time insight into operative decision-making and advanced techniques
- Participate in hands-on cadaver workshops (12 present participants), giving you the rare chance to refine your anatomical understanding and surgical skills in a practical, supervised environment, applied to open, laparoscopic and robotic surgery.

We are deeply grateful to our esteemed faculty for sharing their expertise, and to our organizing committee, partners, and sponsors for making this ambitious program possible.

Whether you're joining us from here in the auditorium or from your screen at home, we invite you to engage fully — ask questions, share insights, and make the most of this unique learning opportunity.

We are looking forward to welcoming you to the Tirol Urogynaecology Summit. Let's begin an exciting and enriching journey together.

Peter & Eduardo

Urogynecology/pelvic floor surgery course

wednesday to friday, 28. to 30. january 2026

Landeskrankenhaus Hall/tirol kliniken

Milser Straße 10, Hall in Tirol

Medizinische Universität Innsbruck

Department für Anatomie, Innsbruck

course fee: 2.200,00 EUR (wednesday to friday)

lectures/online: 280,00 EUR (wednesday to thursday)

Gynäkologie
und Geburtshilfe

am Landeskrankenhaus Hall

Programme

Tuesday, 27.01.2026, 02.00 to 05.00 p.m. Physiotherapy session

2.00 p.m. Pelvic floor dissection,
for physiotherapy practice
Romed Hörmann, Austria

3.00 p.m. Challenges of recruitment
in multicentre studies
Melanie Amort-Achmüller, Austria

coffee break

3.30 p.m. Workshop on faecal continence
Bärbel Junginger, Germany

Wednesday, 28.01.2026, 09.00 a.m. to 05.00 p.m.

9.00 a.m. Welcome session
*Peter Widschwendter, Oliver Andraschofsky,
Eduardo Cortes, Austria*

9.10 a.m. How muscle and connective tissue work
together in the female pelvic floor?
Elisabeth Pechriggl, Austria

9.50 a.m. Imaging in pelvic floor dysfunction:
the pathway to excellence
Kamil Svabik, Czech Republic

coffee break

10.50 a.m. Why do women leak urine?
How to assess and how to treat with
functional/mechanical physiotherapy
Bärbel Junginger, Germany

11.30 a.m. To mesh or not to mesh. That is the
question.
Oliver Andraschofsky, Austria

lunch break

1.10 p.m. Evidence-Based Treatment Strategies
for Anal Incontinence
Marijana Ninkovic, Austria

1.50 p.m. The Fidelia study:
there is light at the end of the tunnel
Rainer Marksteiner, Innovacell Gmbh, Austria

coffee break

3.00 p.m. The evidence behind the use of laser
and radiofrequency in urogynaecology
Stefano Salvatore, Italy

3.40 p.m. Mesh removal: easier said than undone!
Peter Widschwendter, Austria

4.20 p.m. Current Controversies in Prolapse Surgery
Dudley Robinson, United Kingdom

Thursday, 29.01.2026, 08.00 a.m. to 05.00 p.m.

8.00 a.m. Live prolapse surgery (Peter Widschwendter)
with the DaVinci robotic system
*Transfer to the seminar room or present in the
operating theatre (max. 4 participants per operating
theatre) then drive to Anatomy Innsbruck*

lunch break

2.00 p.m. EUGA, the process and advantages of
accreditation with EUGA
Stefano Salvatore, Italy

2.40 p.m. Levels of pelvic organ support seen on MRI,
applied to prolapse surgery.
Markus Hübner, Germany

coffee break

3.20 p.m. Muscle injury in urogynaecology
Eduardo Cortes, Austria

4.00 p.m. Why level 3 is so important
Ayman Tammaa, Austria

4.40 p.m. IUGA, making Urogynaecology global
Dudley Robinson, United Kingdom

Friday, 30.01.2026, 08.00 a.m. to 03.00 p.m.

8.30 a.m. Demopreparation:
connective tissue supports.
Romed Hörmann, Austria

9.15 a.m. Cadaver surgery
(Robotic, laparoscopic and open surgery)
12 participants max.

lunch break

2.00 p.m. Peri-urethral bulking agents:
advantages and disadvantages
Ayman Tammaa, Austria

Bulkamid workshop on pig bladders
Ayman Tammaa, Dudley Robinson, Eduardo Cortes
